DETAILED ACTION

Reasons For Allowance

Claims 28-30 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 28 recites a semiconductor device structure including the specific structural limitations of providing that a semiconductor substrate having a drift region of first conductivity type therein and transition region of first conductivity type that extends between the drift region and a first surface of the semiconductor substrate and has a vertically retrograded first conductivity type doping profile therein that peaks at a first depth relative to the first surface; first and second shielding regions of second conductivity type that extend in the drift region and define respective P-N junctions with the transition region, the first and second shielding regions extending laterally towards each other in a manner that constricts a neck of the transition region to a minimum width at a second depth relative to the first surface. The abovementioned structural limitations are neither anticipated by nor obvious over the prior art of record. Likewise, claims 29 and 30 are also allowable as being dependent upon allowable claim 28.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Relevant Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tu et al., Malhi, Pfirsch, Boden, Jr. and Osanai each disclose semiconductor MOSFET devices.
